

Certified Organic Oryza-mul™

Patented rice bran extract provides multifunctional improvements in cosmetics and personal care products.

Happi, February 2002
NutraCos, March/April 2002

Oryza-Mul™ is extracted from enzymatically stabilized rice bran, using patented technology. This nutrient rich and functional part of rice bran is sold as a spray-dried powder. Oryza-mul™ is a water-soluble ingredient, which can be used in any application where oils and water need to be bound.

Oryza-mul™ contains numerous skin improving nutrients, including protein,

rice bran lipids, tocopherols and tocotrienols, B vitamins, inositol, gamma oryzanol and eight minerals (including Copper). This unique ingredient also contains naturally occurring glycolipids, which assist in providing emulsification capacity to many skin care systems. The ingredient contains a significant amount of various antioxidants that provide enhanced product stability as well as beneficial effects for the skin.

Oryza-mul™ is:

- Certified Organic
- 100% Natural and Non-GMO
- Hypoallergenic (patch testing of rice has not shown to elicit uticularial or allergic reactions)
- High in Minerals, Vitamins and Nutrients
- High Water Holding Capacity / Moisture Retention
- Contains NO Animal Proteins
- Not Genetically Engineered or Manipulated
- Stable for up to Two Years in Original Packaging

RIBUS has taken a Natural / multifunction approach in the creation of Oryza-mul™. You now have access to all of the nutritious and functional compounds in rice bran, without the fiber. Upon request, it can even be made Organic.

Oryza-Mul™ by RIBUS remains intact, as nature put it together.
